ORCHID PLANTS

This is only a partial list of varieties we will have for sale this coming year. Many are scarce and some very rare kinds are sometimes available. We invite your inquiry for those varieties not listed.

Cymbidium or Spray Orchid

Campbell's CATTLEYA ORCHIDS

Growing these Aristocrats of the Flower World is becoming an American hobby. The extravagant beauty of these exotic blooms is a never ending source of admiration. Cattleyas are easily grown in pots in sunrooms and glass houses. Our collection includes only fine hybrids in charming colors and forms. Cattleyas can be offered for sale only locally. We invite our Southern California friends to see our Orchids for gorgeous specimens they will wish to add to their collections. Prices begin at \$15.00.

Cattleya Orchid

Campbell's CYMBIDIUM ORCHIDS

These are spectacular, large flowered, spray Orchids which are easily grown in pots or shaded beds in Southern California gardens, or as hot house plants elsewhere. They make clumps of grassy foliage 2 to 4 feet high, and in winter and spring carry great sprays, from 1 to 3 feet long, of most beautiful Orchids in tones of pink, lavender, yellow, cream, bronze, chartreuse and delicate green. The colors of hybrids are variable, and even in the same variety, as listed below, there will be a rather wide range of color. We cannot guarantee a specific shade, but they will all be beautiful.

We offer the very finest hybrids, true collector's items, including the rare and beautiful crosses of:

Alexander Westenbirt F.C.C. Pauwelsi-Comte de Hemptine F.C.C. Ceres-F.C. Hanbury F.C.C.

Plants are available in various sizes and prices. Growing back bulbs of the choicer crosses beginning at \$15.00.

The following Standard Cymbidium Hybrids, of the best quality, are strong growers and reliable bloomers. We can supply plants of varying sizes and prices. Back Bulbs with sturdy vegetative growth are priced at \$5.00.

BEATRICE. Shimmering pale yellow-green English hybrid. Blooms mid-season to late.

BUTTERFLY. Usually comes in shades of yellow or bronze, occasionally a pink tone appears. (Insigne x Lowio-grandiflorum.) Mid-season to late.

CANARY. Varies from clear yellow to buff, with a striking red lip. (Pauwelsi x Butterfly.) Mid-season.

CAPELLA. Cream to rose pink, large with many flowers to the spray. (Pauwelsi x Wiganianum.) Mid-season.

HUGH EVANS. Usually greenish gold with bright red lip. Very free flowering and lovely. (Lowianum x Curlew.) Mid-season to late.

MADELINE. Quite variable in color, from yellow to lavender pink. (Insigne x Pauwelsi.) Mid-season.

PAUWELSI. Light creamy yellow to rich bronze. A very strong grower with exceptionally long bloom spikes. Midseason.

PETREL. Gleaming golden yellow. (Garnet x Pauwelsi.) Late.

SCHLEGELI. Usually in pink tones. (Insigne x Wiganianum.) Early.

orchids. Pack carefully and tightly around the roots. No soil required. Per lb. \$1.00. Postpaid.

NEW FLOWERS FOR YOUR '47 GARDEN

ALL DOUBLE PETUNIA

Mrs. Dwight D. Eisenhower. '47 All-America Silver Medal Winner. Large, uniformly double flowers of a soft mid-salmon are freely produced on dwarf, bushy plants about 16 inches in height and 30 inches in spread. The beautiful blooms are about 2\%4 inches across, very effective for bedding, borders, pots or cutting. Pkts. \$1.00.

ALL DOUBLE PETUNIA

Rose Marie. '47 All-America Bronze Medal Winner. The blossoms of this new Petunia are a delightful rose-pink shade, 3 inches and more across. The plants are about 18 inches tall spreading 30 inches. A splendid thing for bedding and cutting. (Color picture on page 19.) Pkts. \$1.00.

ANTIRRHINUM

Velvet Giant. '47 All-America Bronze Medal Winner. An outstanding "Tetra" variety. The large flowers are crimson with a velvety texture which adds richness. The plants are tall growing, base branching, about 2½ feet in height. Six to 12 spikes are usually produced by each plant, making Velvet Giant very effective for garden display and for cutting. (Illustrated in color on page 19.) Pkt. 35c.

MARIGOLD

Naughty Marietta. '47 Honorable Mention, All-America Selections. A new large flowered dwarf single French Marigold with gleaming yellow blooms, attractively shaded with mahogany at the base of the petals. When in full bloom the dwarf compact plants are literally covered with the 2-inch golden blooms making an extremely bright showing for garden borders. Pkts. 25c.

DELPHINIUM chinensis

Blue Mirror. Per. A new spurless type with wide open flowers of clear, bright royal blue turned upward as though mirroring the sky. This habit of growth makes it especially attractive for low borders or cutting. The 12- to 15-inch plant blooms the first year from seed and throughout a long season. Pkt. 25c.

CLIMBING PANSY

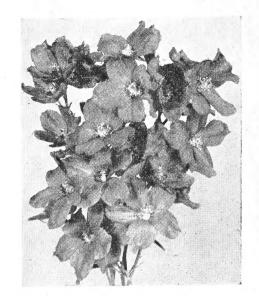

This very attractive Pansy was first a florist development for length of stem and abundance of flowers. It is now becoming popular for growing on trellises in garden, sunroom, or glass house. It may also be allowed to trail gracefully from pots, hanging baskets, and window-boxes. The Climbing Pansy now has a wide and beautiful color range. Pkt. 50c.

SALVIA, Pink, White, and Lilac

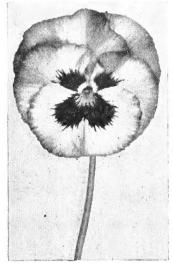

Salvia Welwyn is the most unusual flower introduction in years. It was developed on a Long Island estate, "Welwyn", and presents colors unheard of in the Salvia splendens group. It comes in clear salmon-pink, pure glistening white, and true lilac, welcome in any garden scheme. Pkt. 50c.

Campbell's DEPENDABLE SEEDS

FLOWER SEEDS

Since 1907 Campbell's Seeds have been collected from the best possible sources of the world, rare-plant specialists, foreign companies old enough to be traditions, and the wide, sunny valleys of California. They have been growing their own reputations in gardens all over the United States. Let them grow a reputation for You and Your Garden.

All seeds and books sent postpaid; prices of roots and plants do not include postage. All prices subject to change without notice.

Directions and advice are part of our service. Call on us when you want to hire a gardener.

Ask for our Bulb List, ready by August first.

Should you not find the certain variety of seed you want in this catalog, ask us for it. We are in touch with the leading growers in this country and can obtain kinds not in stock in from 3 to 10 days, if they are available.

In the brief descriptions of flower seeds that follow we have compiled much information for most of them such as germination period, time best for sowing, duration of plants (whether perennial (Per.), plants growing and flowering for several years; biennial (Bien.), growing the first year to flower and die the second, and annual (assumed to be the duration if no other habit is indicated), and notes on culture. The colors found in each genus indicates the normal color range but need not infer that all these are available in separate colors.

ACROCLINIUM roseum hybridum. ak-roh-klin'-ee-um. Full sun. Pink and white, double, everlasting flowers; often bloom in 8 weeks; 1½ feet high; sow November to March. Germination period 2 to 3 weeks.

"Formal Planting"

IDEAL FOR PATIO AND FORMAL GARDEN

A small area back of the house can be a gay spot of color when planted to annuals. The geometric or formal shape is kept throughout the plan and is echoed in the walks or grass; by the shape of the beds and their edging and by the enclosure itself (fence, hedge or shrubbery).

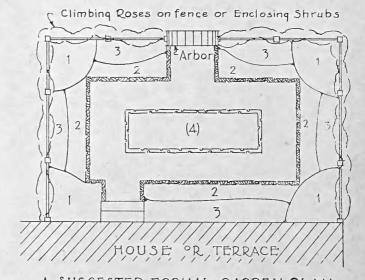

Since we are here concerned mainly with the planting let us assume your space has good proportions, appropriately connected to the house so you can enjoy it, and that you can provide either a fence with roses or similar enclosure to the garden as shown.

In California we plant two gardens a year. When you plan your fall planting don't overlook the bulbs, which when planted before sowing annuals will make a gloriously different garden in spring. Below is a suggested list of annuals to use.

the garden is larger or it is desired to have more and different colors represented varieties of the same flower can be used in beds 2, 3 and 4, keeping the selection to flowers of the same height. Such gardens are very pleasing when in one color as blue, yellow or pink or in the complementary colors as blue and yellow with white flowers for accent.

The little hedges indicated as "edging" in this sort of garden are important to show the garden lines—since neatness throughout is essential to the appearance.

With a paved center—flagstones—or a barbecue arrangement at one end such a garden can become a very important and beautiful part of the home living scheme.

A SUGGESTED FORMAL GARDEN PLAN

1. CORNER PLANTING

Sow Spring Sow Fall Calendula Delphinium Stocks Zinnia Cockscomb Larkspur Delphinium Marigold Snapdragon

2. MEDIUM HEIGHT ANNUALS

Sow Spring Marigold Shasta Daisy Gaillardia

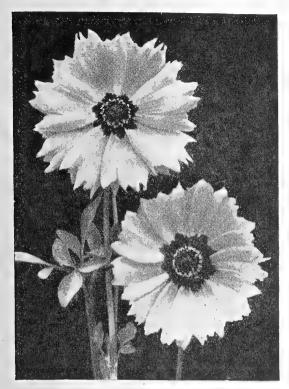

Sow Fall Centaurea Calendula. Carnation Petunia Phlox

3. TALLER ANNUALS

Sow Spring Larkspur Cosmos Hollyhock Zinnia. Marigold

Sow Fall Poppies Scabiosa Snapdragon Larkspur

If this bed is used it should be planted to one kind of annual selected from lists 2 and 3, with bulbs,

Lilies from Seed

Growing lily bulbs from seed is becoming a popular hobby with amateur gardeners. Really fine bulbs can be raised from seed with a little patience and care. Seeds should be sown in flats of soil prepared by mixing good garden loam with equal parts of sand and leaf mold or peat, covering with ¼-inch of sifted mixture. Press firmly and soak the flat in water after which it is placed in a shady place to await germination Seed may be sown at any time. The little plants first make root growth and bulbs before showing any impressive top growth. They should be transplanted the second year into larger flats of prepared soil with a little bone meal or to specially prepared beds outdoors. The following year they should be large enough to go into the garden. Species germinating readily are marked with an asterisk (*) before the name.

LILIES, True Lilium Species. Per. lil'-i-um.

Part shade or sun if root area is cool and moist.

Auratum var. platyphyllum. Gold-Banded Lily, outspread white petals, each striped with a yellow band and spotted with crimson; fragrant; 4 to 7 feet; blooms August-Sept. Pkt. 25c.

Candidum, Madonna Lily. Probably the most popular of all Lilies. 8 to 10 lovely white blooms grow in a stately spire on a strong, straight stem 4 to 6 feet tall. Plant March or April outdoors, February under glass. Germination period 3 to 6 weeks. Flower in June. Pkt. 25c.

Campbell's California Wild Flower Mixtures

will grow almost anywhere, cover vacant lots and bare corners, and furnish cut-flowers. An ideal souvenir!

Cultural Note: Best sown in late fall in all climates, since they will bloom in late winter and spring in a mild region, yet lie dormant and sprout and bloom in early spring in the cold sections of the U.S. They may still be sown, with sure results, as late as April in Southern Calif., and June in the cooler sections. Broadcasting the seed, mixed with sand, over finely-pulverized soil in the open is the best plan. Rake-in very lightly, or merely cover with scattered soil or peat. If in the fall, do not water; if in the spring when natural rainfall cannot be depended upon, keep moist until sprouted, and irrigate thereafter.

Campbell's Special Mixtures, in contrast to many cheap mixtures, contains only California natives. The two mixtures are alike (with more than 30 species represented, to give a long and interesting season of bloom), with this exception: There is no California Poppy in mixture No. 2, for those who may have these bright flowers already established.

Mixture No. 1, including California Poppies. Lb. \$7.50; 1/4-1b. \$2.25; oz. 75c; ½-oz. 50c. Pkt 10c.

Mixture No. 2, all varieties except California Poppy. Lb. \$8.50; ¼-1b. \$3.00; oz. \$1.00; ¼-oz. 60c; Fkt. 15c. Souvenir Collection of 10 Dependable California Wild Flowers, in separate 10c packets, our selection, Special for 75c.

Zinnia

ZINNIA. zin'-ni-a. Sun.

Our summer specialty. Pinks, reds, yellows, and purples, in vivid shades, unexcelled for summer bedding and cut-flowers. Sow February to July. Germination period 5 to 10 days. Cultural Note: Sow Zinnia seed where the plants are to bloom if this is at all possible; otherwise transplant when the seedlings are small. When watering, rather than use the sprinkler, irrigate by the trench method and let the water run slowly for several hours until it has soaked down thoroughly into the ground through and beyond the roots. You will then have maximum results, yet need to water the plants only once every two weeks if the top soil is properly cultivated a day or so after each irrigation.

PLANT VEGETABLES FOR A CONTINUOUS SUPPLY

It is often desirable and practical to extend the harvest period of certain quick maturing vegetables by making a succession of sowings. Thus, after the first sowing, a second one is made a week or two later and possibly a third or fourth so that as the first crop is harvested and gone the second will be ready to harvest. Most of this planning is guess work without some knowledge of the duration or time a crop is in condition for picking.

The following table is intended only as a guide in planning succession plantings, since exposure and weather conditions and the family needs of a crop make it at best an approximation.
